Spring 2024 Edition

Hello LPA Members! We have amazing water! To deliver this award-winning water to you we are dependent upon the functionality of many pieces of infrastructure including emergency backup power. Last winter into spring the water department was able to replace the two obsolete generator units at the pumphouse and water plant. Having these new generator units ensures our water resiliency and readiness in the event of a local emergency. Reminder, service valves in the easement area are generally the property of LPA and should not be operated by anyone other than water personnel. The water department's emergency number is (530) 307-1106.
